

## INDIAN EXPORTS

### 'Indian exports'

Sir,—This refers to the letter "Indian Exports" (Jan. 8). The Indian Medical Association has always viewed with concern the damages resulting from the use of spurious drugs and contaminated dressing materials, as these will worsen the condition of the ailing person.

We urge that every dressing and drug used for medical purpose be subjected to strict scrutiny by the concerned authorities.

Offenders have to be brought to book without fear or favour. The manufacturers of these items owe a moral duty both to the public and to the profession and must maintain the highest standards in their products.
